

Fundamentals of Artificial Intelligence

Steven M. Bragg

Table of Contents

Chapter 1 – Foundations of Artificial Intelligence.....	1
Learning Objectives	1
Introduction.....	1
Perception: Machines That See and Hear	1
Learning: The Engine of Improvement.....	2
Reasoning: Drawing Conclusions from Knowledge.....	2
Decision-Making: From Insight to Action	3
Machine Learning: The Core of Modern AI	4
Deep Learning	5
Key Model Architectures and Algorithms	6
The AI Model Development Lifecycle	7
Model Availability and Reliability	9
AI in Practice: Applications and Examples.....	10
Key Considerations in Building AI Systems	11
Summary	12
Review Questions.....	14
Review Answers	15
Chapter 2 – Understanding Data: The Raw Material of AI	17
Learning Objectives	17
Introduction.....	17
The Importance of Data in AI	17
Types of Data in AI	17
Data Sources and Collection Techniques.....	18
The Dimensions of Data Quality.....	19
Data Labeling and Annotation	21
Data Augmentation and Synthetic Data.....	22
Data Pipelines and Infrastructure: From Lakes to Warehouses.....	24
Well-Known Datasets and Their Impact on AI.....	25
Legal and Ethical Considerations	26
Summary	28
Review Questions.....	29
Review Answers	30
Chapter 3 – Machine Learning Fundamentals.....	31
Learning Objectives	31
Introduction.....	31
Key Machine Learning Model Types	31
Decision Trees.....	31
Ensemble Methods: Random Forests and Boosting	32
Neural Networks and Deep Learning.....	33
Convolutional Neural Networks	34
Recurrent Neural Networks	34
Transformer Models.....	35
Fundamental Training Concepts	36
Overfitting and Underfitting	36
Bias-Variance Tradeoff	37
Setting the Learning Rate	37
Early Stopping	38
Model Evaluation Metrics	38
Summary	39
Review Questions.....	40
Review Answers	41

Table of Contents

Chapter 4 – Natural Language Processing	43
Learning Objectives	43
Introduction	43
Key Concepts in NLP Modeling	43
Tokenization and Text Preprocessing	43
Text Vectorization	44
Model Training and Fine-Tuning	44
Model Evaluation	45
Deployment and Machine Learning Operations	45
NLP Applications Across Industries	47
Finance	47
Healthcare	48
Customer Support	49
Legal	51
Retail	52
Challenges and Best Practices in Building NLP Systems	54
Summary	55
Review Questions	56
Review Answers	57
Chapter 5 – Computer Vision	59
Learning Objectives	59
Introduction	59
Image Processing Fundamentals	59
Image Classification	60
Object Detection	60
Image Segmentation	61
Video Analysis and Temporal Models	61
Deployment of Vision Models	62
Common Challenges in Computer Vision	63
Summary	64
Review Questions	65
Review Answers	66
Chapter 6 – The Responsible Use of AI	67
Learning Objectives	67
Introduction	67
The Role of Ethics in the AI Development Lifecycle	67
Algorithmic Bias: Sources and Risks	67
Principles of Fairness and Inclusion	68
Transparency and Explainability	69
Human Oversight and Accountability	69
Governance Mechanisms in AI Teams and Organizations	70
Long-term Responsibility and Public Trust	70
Summary	71
Review Questions	72
Review Answers	73
Glossary	75
Index	77
